

I don't think it's right for you to tell someone that you cannot have local or national weather and traffic programing if I pay for a service. The FCC allows cable to air The Weather Channel, I am able to see the weather in other parts of the country as well as my local. What is the difference? For someone on the road it is helpful to know the weather and traffic. I fill that the FCC has an obligation to reject the NAB's petition 04-160 and support XM's ability to provide the kind of programming that can save lives and time knowing what dangers might be ahead. Shame on you "FCC" if you let The National Association of Broadcasters use its lobbyists, campaign contribution and political influence sway your obligation to do what is right. Now I have taken time out of my life that I will not be able to ever get back to wright this letter and you have lost you time as well, Please don't let this be a waste of time. I don't know how many letters you will get but I hope this one will make a difference.

Thank you
Gary Hawkins
